**Subject:** Just wanted to thankyou

Hello Prof. Kwoh,

I just wanted to thank you for all the help extended to me as your student, while doing my MSc Bioinformatics course at NTU. We found your classes very interesting since you had a way of making very difficult concepts very simple and we could understand it well. It was nice of you to give me reference letters when I wanted to apply for further studies. Setting up the communication links for ongoing projects was a big help in communicating with our fellow students, which helped in a big way, not only to do the projects but also to communicate with others with respect to our studies as well. You had shown concern and interest for all the students and have been quite helpful in many ways. I wish you all the best and hope to work with you in future.

Sincerely,

Saraswathi.
