Notes: (as of 27 November 2020)

1. Countries are compared by the same two-week periods since their first confirmed death.
2. Viet Nam's first death was reported on 31 July 2020, much later than most countries. Thus, no results for Viet Nam are available since weeks 19-20.
3. For most countries in the sample, weeks 3-4, 15-16 and 27-28 correspond to late March, June and September 2020, respectively.
4. The star * indicates countries with low test ratios.
